

MOISTURE ANALYZER MAC

release date 23-05-2013

A moisture analyzer is a laboratory measuring instrument designed to determine relative humidity content in relatively small samples of various substances.

Moisture analyzer series MAC features:

- easy operation provided by backlit LCD display
- drying profile (standard, mild, step, rapid).
- finish mode (manual, humidity stabilization, automatic, time defined).
- GLP/GMP printouts and reports
- infrared lamps
- standard and non-standard applications
- optimization of work ensured by halogen lamps mode

Maximal capacity of a moisture analyzer series MAC is 210 g /1 mg. Maximal drying temperature is 160°C (an extra cost option is a moisture analyzer with drying temperature upgraded to 250°C).
